

Construction Site Supervisor Apprenticeship Level 4

Study Mode: Full-time | Course Level:

Is this course right for me?

Construction site supervisors are based on construction sites and are responsible for the supervision of specialist contractors and construction workers.

Typical roles under this employment category include site manager, site supervisor, assistant site manager, assistant supervisor or construction site supervisor.

Entry Requirements

Individual employers will set the entry requirements they require applicants for the apprenticeship to have.

What will I learn?

During the programme the apprentice will gain knowledge and understanding of:

- Supervision of specialist contractors
- The control of health and safety standards on construction projects
- Recording, control and reporting of progress on a construction project
- The minimisation of the environmental impact of construction projects
- Control of quality of works on a construction project
- Assisting commercial staff with the monitoring of costs on a construction project

What skills will I gain?

During the programme the apprentice will gain skills and knowledge in:

- Health and safety: identify risk of activities and encourage all employees to demonstrate safety-conscious behaviours
- Sustainability: assess, identify and record the environmental impact of project
- Construction technology: assist in the implementation of the most appropriate solutions for construction projects
- Project management: use effective management principles and be able to supervise construction workers

What can I do next?

Successful completion of the programme will enable the apprentice to progress to full-time employment in a relevant role in the construction industry.
