# PLANT TRAINING

The West Midlands Combined Authority is working in partnership with City of Wolverhampton College together with City of Wolverhampton Council to deliver a range of training programmes in construction plant operation, including mini excavator, forward tipping dumper and ride on roller.

This is an employment led initiative to support people into jobs and careers in the construction industry. This course will give you the skills and relevant cards you'll need to begin a career in plant operation and at the end you are guaranteed an interview with a relevant construction employer.

Whether you're looking for a rewarding career, a change in job or returning to work, there's a place for you in construction.

## What to do next

Training programmes run throughout the year. Once you have indicated an interest either direct to City of Wolverhampton College, to your Job Centre work coach or via Wolves at Work you will be invited to the next information session. During this session you will be given details of the planned training, funding guidance and the potential work outcomes.
