# TRAINING FOR THE WEST MIDLANDS RAIL SECTOR

Proudly supported by:

Investment in rail projects and upgrades is set to surge in the West Midlands and there is already a proven need for qualified and skilled rail workers within the region. The West Midlands Combined Authority is working in partnership with City of Wolverhampton College together with City of Wolverhampton Council to deliver a range of training programmes in the laying and maintenance of rail track.

This is an employment led initiative to support people into jobs and careers in the rail track industry. This course will give you the skills and relevant cards you'll need to begin a career in this sector and at the end you are guaranteed an interview with a relevant employer.

Whether you're a person looking for a rewarding first job, a change in career or someone returning to work, opportunities await in a sector you may not have previously considered.

Contact us today!

## What to do next

Training programmes run throughout the year. Once you have indicated an interest either direct to City of Wolverhampton College, to your Job Centre work coach or via Wolves at Work you will be invited to the next information session.

During this session you will be given details of the planned training, funding guidance and the potential work outcomes.

 Rail Training Centre, Wellington Road Campus, WV14 6 BT
